- A hard working and dedicated employee demonstrated through traveling long distances for work experience and learning many technologies during the three month bootcamp.
- Techniques and software skills developed in Advanced manufacturing include CAM software, Manual Machines, and CNC setups.
- Understanding the basics of JavaScript, NodeJS, MongoDB, VS code, SQL, ReactJS, Bootstrap, CSS and Html.

Education

Denver University Boot Camp

Graduation, Oct 2022

- Full Stack Cert

Pickens Technical College - Aurora, CO

Program Completion, May 2021

- CAM technician

Work Experience

Dynetics- Lathe Machinist

August to November of 2021

- Given work orders to machine various metals with specific dimensions and tight tolerances.
- Worked in a timely manner to meet a criteria prior to the deadlines.
- Kept track of finished and scraped parts to have a final report of my overall workload and time to finish for the customer's final payment.

Denver University - Full Stack Junior Dev

July to October of 2022

- Worked on three group projects with members selected by an instructor or class peers to fulfill a set of requirements of what we learned before each project.
- Between each group project I had to learn six technologies and best practices to apply them to projects I worked on independently.

Application's Made

Trip Split - group project, October 2022

- Helped create the back-end query and seed the test data for the front-end team to connect the database. For the front-end I worked on connecting queries to a new technology called ChartJS to track expenses of users called from the database. (javascript, MongoDB, mongoose, graphql, React)
